

## **Miami University Regional Campuses Hamilton & Middletown**

**Miami University Regional Campuses offer the best of both worlds:** a small college environment and the academic reputation of a major university. More and more people are thinking about the costs of college and considering the benefits of choosing a smaller college close to home.

*Take a closer look at our advantages.*

**Get a Miami education at an affordable cost,** Miami's regional campuses have the lowest tuition rate of all regional campuses in Southwestern Ohio. With our lower cost and abundant scholarship resources students can often minimize their student loan debt by taking classes for two or more years on our campus before relocating to the Oxford campus. You can relocate from Miami's Regional Campuses to the Oxford campus after completing just 20 semester hours in good academic standing. It's that easy.

We know that some of our students expect to start here and complete their degree at another college. Our program accreditations are respected by colleges and universities nationwide.

**Of course the quality of your education counts.** Students will find a challenging array of classes taught by our outstanding Miami faculty -- faculty who write textbooks, edit scholarly journals, conduct research and earn high honors for their dedication to teaching.

**Learning isn't confined to the classroom.**

Members of the Model UN go to New York City each year to work for a week in the real United Nations building. Our students have interned at the White House and Disney World. A group of our nursing students make an annual trip to Africa. Our botany students can be found doing field work in Wisconsin and Florida. We also offer co-op in our technical degree majors.

**Flexibility is the name of the game** for many of our students who are working their way through college. They need to balance college, work and life. We offer flexible schedules including evening and weekend classes and the Voice of America Learning Center in West Chester will open in January 2009. We are also increasing the number of on-line course offerings to meet the needs of our working students.

**Miami Regional Campuses have an open admission policy.** This means that anyone with a high school diploma, GED, alternatively educated or home school diploma are eligible to attend. Students have access to free services such as tutoring, personal counseling, learning assistance labs, and career and job placement. We offer on-site childcare.

***So when you're thinking about your future as a student, take a closer look at Miami University's Regional Campuses in Hamilton and Middletown.***

## Recommended Curriculum

If you are planning to pursue a bachelor's degree, Miami University recommends that you complete the following in high school or through alternative education.

- Four units of college preparatory English
- Three units of college preparatory mathematics (including Algebra II)
- Three units of college preparatory natural science (including both a physical and biological science)
- Three units of college preparatory social studies (including one unit of history)
- Two units of foreign language, both in the same language
- One unit of fine arts, including art, drama, or music (either appreciation or performance).

You will not be denied admission if you do not meet these standards. Instead, you will be required to complete additional courses, which will count toward graduation.

**Students who enter an associate degree program will not have to complete additional courses to make up high school deficiencies unless they continue on for a bachelor's degree at Miami**

ACT or SAT scores are required from current high school seniors and recent high school graduates. Regional campuses do not use these scores to accept or deny students. Test scores may be used by some departments for scholarship awards or possibly for advanced admission to selective programs such as nursing.

COMPASS Placement testing is required of all new students. At Miami we follow a mandatory placement policy in math. Students must enroll in the math class that they tested into on the COMPASS assessment. High school level math courses are offered but are considered remedial until the pre-calculus level.

Majors at Miami that fit into College Tech Prep Pathways include:

- Business Technology
- Chemical Technology
- Computer Technology
- Computer & Information Technology
- Engineering Technology (Mechanical or Computer and Electrical)
- Nursing

**College Tech Prep Scholarships are available.** Students must apply for admission and complete a scholarship application by April 1 of the senior year.
